

The chemical database included with the RBCA Tool Kit was as complete as we could make it while maintaining proper citations. Any chemicals not listed in the RBCA Tool Kit database must be added by the user.

For various reasons, we do not typically grant user requests for chemical information. However, the following link to the US EPA IRIS database may help you out:

<http://www.epa.gov/iriswebp/iris/index.aspl>

The instructions for customizing the chemical database are on pages 16-17 of the RBCA Tool Kit manual, or on pages 19-20 of the RBCA Tool Kit for TRRP manual.
